

Autism Atlas Resource List

Self-Care: Ideas to support your loved one and yourself!

UNM CDD

Family and Provider Resource Team

Our staff believes that families know their loved ones best. Teamwork between family members and autism professionals has the best results for individuals with ASD. We have staff members who serve as resource specialists to help families with problem-solving individual issues or systems' navigation through phone and electronic communication. Families are welcome at all Autism Program training, and our training team consults family members while developing training content.
