

## GOING TO THE DOCTOR DURING PANDEMIC - ADULT

Going to the doctor or dentist might look different during COVID-19.

When I arrive, I may have to wait while they ask me some questions and take my temperature.

I will need to wear my mask and clean my hands before I go in.

The doctors and nurses will be wearing masks too. They may even wear a face shield or special goggles.

They will still take care of me and answer any questions I might have.

My doctor and dentist are helping keep me and their other patients healthy.
